## OPERATION SYSTEMS DIAGNOSTIC MOBILE APP Advanced service tool

Our Suzuki Diagnostic System Mobile (SDS Mobile) App lets you send your Suzuki Authorised Dealer all the technical information they need to service and maintain your outboard, instantly and easily.

\*Available for SUZUKI MULTI-FUNCTION GAUGE and SUZUKI MULTI-FUNCTION DISPLAY.

SDS Mobile works in tandem with our Multi-Function Gauge and Multi-Function Display. Simply download the App, which is available on iOS and Android, to your smartphone: you don't need a separate device.

When you email your data scanned from QR code to the Dealer, they will be supplied information including engine number, number of hours since the last oil change, total hours of operation at different rpm, and technical information.

\*DENSO WEB owns the right of name and logo of QR code.

DOWNLOAD THE APP FROM:

Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc., registered in the U.S. and other countries.

Google Play and the Google Play logo are trademarks of Google LLC.

SDS Mobile App and email service is entirely free of charge.

## HOW IT WORKS

1. The Outboard sends engine data and converts it into a QR code displayed on the Multi-Function Gauge or Multi-Function Display.
2. With the SDS Mobile App, you can then scan the QR code on the Multi-Function Gauge or Multi-Function Display with your phone. The engine data will be stored on your smart phone.
3. You can then send the engine data via email to your Suzuki Dealer.

# SUZUKI KEYLESS START SYSTEM

## HIGH SECURITY

- Suzuki original engine starting system features an **immobilizer** function for added peace of mind. IC access codes installed in the key-fob and engine must match for the engine to start. This prevents starting the engine with the wrong key making the system a good theft deterrent as well.

## EASY OPERATION

- Suzuki original engine starting system offers a variety of functions. The key-fob is easy to carry and one is all you need to enjoy stress-free starts for greater boating pleasure.
- One step ahead of the competition, the Suzuki Keyless Start System requires no mechanical key so the key-fob remains safely in your pocket.

## WATERPROOF FLOAT KEY-FOB

- The easy to carry key-fob remains safely in your pocket reducing risk of a lost key. The key-fob is waterproof and floats so should it ever go overboard it is retrievable.

# EXTRA OPTIONS AND INFORMATION

## Lean Burn Fuel Control Technology

### LEAN BURN

Fuel efficiency matters whether you're boating for pleasure or profit. Our Lean Burn Fuel Control Technology combined with Suzuki Precision Control, delivers the optimum fuel/air mixture to the engine. The system is designed to save fuel both at low speeds and up into the cruising range.

**LEAN BURN**

### COMPARISON OF FUEL ECONOMY

Uses 14% less fuel compared to the original DF300, mainly in the cruising range where the engine is used a majority of the time.

Data used in the graph was obtained through in-house testing under unformed conditions. Results will vary depending upon operating conditions (boat design, size, weight, weather, etc.)

## COUNTER SELECT CONNECTOR

**36612-98J20-000**

Applicable Model DF150AP/175AP  
DF200AP/250AP/300AP

Converts to counter rotation specification.

## Suzuki Selective Rotation

In multi-outboard installations on large boats, a counter-rotation outboard is usually paired with a regular rotation model to help keep the boat traveling on an even keel and in a straight line. AP Models are built with special counter rotating gearing in the lower unit, which causes the prop to rotate in the opposite direction. Suzuki Selective Rotation eliminates the need to purchase a dedicated counter-rotation outboard by using a special switch that when connected to a circuit inside of the engine compartment, turns a regular rotation outboard into a counter-rotation model with a counter rotational propeller.\* This industry first is made possible through a special, unified design of gears, shaft, and bearings in the lower unit that are designed to operate reliably and efficiently in either regular or counter-rotation directions.

\* Make sure you consult with your dealer before changing Regular Rotation to Counter Rotation (or vice versa).

**SUZUKI  
SELECTIVE ROTATION**

## TROLL MODE SWITCH PANEL

**37860-87L00-000**

Applicable Model DF40A-200A/  
150AP-300AP/  
325A/350A

Activates SUZUKI Troll Mode System and controls RPM from idling engine speed up to 1200rpm at every 50rpm.

## SUZUKI TROLL MODE SYSTEM

An optional extra on Remote Control models from over DF40A, this easy-to-use system lets you adjust engine speed in 50rpm increments, giving highly precise control at low revs. With its own tachometer and control switch, it works alongside our multi-function gauges and analogue gauges. (Suzuki Troll Mode System is originally equipped with Tiller Handle models from over DF40A.)

\*Not Applicable for DF200,225,250

## What is PROPELLER

Propeller selection is very important in the performance of your boat. Acceleration, speed, fuel efficiency, stability and engine RPM all are affected by the propeller selected. Operating requirements and conditions will also affect which design, style and pitch of propeller you may choose to meet your individual needs. The combination of boat, engine and appropriate propeller size may have already been tested by the boat manufacturer. **Your Customer may need your assist with the process to determine the correct propeller for their application.**

## Stainless Steel Propellers

Suzuki Stainless Steel Propellers offer higher performance and greater durability than aluminum propellers. The aggressive design of these propellers enhances the overall performance of your boat and the durability of the stainless steel construction will give you long term dependability. Your Suzuki Stainless Steel propeller is also fitted with a rubber cushion hub to help absorb vibration and shock should you strike a foreign object.

## Propeller Sizing

When referring to propeller size, such as 3 x 13 x 18, the first number is the number of blade, the second number details the diameter of the propeller and the third number is the pitch of the propeller.

The pitch is the most significant number in the description. The diameter is usually predetermined by the propeller engineers and is based on the size and series of the engine.

## Diameter

Diameter is considered to be the distance across an imaginary circle that is made when a propeller is rotated. Diameter is determined during the engineering process of designing a propeller and is usually based on requirements to meet the needs of engine size, gear case design, horsepower and speed.

## Pitch

Pitch is used to describe the theoretical distance that a propeller “cork screws” through the water in inches of forward travel. In theory, an 18” pitch propeller would move ahead 18” with each complete revolution of a propeller. There is always some percentage of inefficiency as water conditions, boat weight and propeller style are introduced into the performance equation. The lower the “slip factor,” the more efficiently the propeller will perform and the faster the speed at a given engine RPM. Lower pitches accelerate faster, but have a lower top end speed. Higher pitches have a slower acceleration, but may attain higher top speeds. An inch of pitch generally is equal to 150-200 engine RPM at wide open throttle (WOT). If pitch is increased by an inch, RPM will decrease by 150-200 RPM at WOT. If pitch is decreased by an inch, RPM will increase by 150-200 RPM at WOT. Always operate your boat/engine combination within the recommended RPM range guidelines as stated in your operator’s manual. Operating outside the recommended range can cause severe damage to your engine and may void the engine warranty.

## Propeller Cup

Cup is used to reduce the slip and ventilation of the propeller. This will allow you to operate your engine at a higher transom mounting and allow you to use more trim for bow lift. The cup refers to the area along the trailing edge of the propeller blade that has an increased pitch in the last 1/2” of the blade surface and extends to the blade tip.

## Rake

Rake is described as the angle, in degrees, that the propeller blades are mounted to the “barrel” of the propeller. The blades of a zero degree rake propeller are mounted perpendicular to the “barrel” of the propeller. The blades of a higher rake propeller angle more to the rear of the propeller. A propeller with a high rake design will hold the water on the blades longer during operation and will ventilate less at higher engine heights. High rake propellers will produce higher thrust that will help lift the bow of the boat more effectively.

## SUZUKI PROPELLERS

# WATERGRIP

### Ultimate power delivery

All Suzuki propellers are designed specifically for your outboard to give outstanding performance for long reliable and trouble free service. Made from stainless steel they are incredibly hard wearing making them durable, dependable and fit for purpose.

To get the best from your outboard we have launched a new series of propellers. Our very first propeller brand; WATERGRIP.

## THE NEW

# WATERGRIP RANGE

WATERGRIP is a new stainless-steel propeller series offering accurate response to your operation. With efficient conversion of engine power into propulsion, this propeller series meets our customers' demand for bigger, faster, more powerful outboards.

The WATERGRIP propeller series employs a new interchangeable and square shaped propeller bush that minimises power loss in delivery.

#### PROPELLER BUSH ADVANTAGES

- Better resistance over propeller slip
- Interchangeable bush

## WATERGRIP

The WATERGRIP series will be the new standard for Suzuki propellers. The new interchangeable and square shaped bush system is designed not only to be replaced easily and quickly when required, but also to accurately and efficiently convert power from the engine to thrust through the propeller.

As a result, you will be able to enjoy more time having the ultimate experience on the water rather than waiting for repairs on the land.

## WATERGRIP DUAL

Our new flagship models, the DF350A and DF325A, introduced the Suzuki Dual Prop System, an industry-leading technology that is truly a revolution in innovation. Big engines demand more efficient conversion of engine output into propulsion.

With two contra-rotating propellers operating simultaneously, the conversion efficiency becomes greater as does stability, grip and manoeuvrability. The end-result is that the Suzuki Dual Prop System delivers outstanding and exciting performance.

## WATERGRIP SPORT

In addition to ease of maintenance and efficiency of power conversion, the WATERGRIP SPORT propellers feature a high rake blade design, which delivers excellent acceleration and exceptional top speed. These propellers are ideal for lightweight sports boats as they give remarkably stable thrust when turning which results in superior manoeuvrability and lots of fun boating.

## MAINTAINING YOUR SUZUKI ECSTAR OIL The ultimate formulation

In the 1980's, Suzuki started the development of lubricants in pursuit of the ultimate performance. The lubricant is named "Ecstar" as it is our guiding "Star" towards an "Ecstatic" performance. As the expectation towards our products evolves, the same attention to performance is required for durability and environmental protection. With the high technology cultivated through its long history and dedicated engineering, Suzuki has precisely reformulated "ECSTAR" to satisfy and exceed these requirements.

By enhancing and drawing out the best performance, "ECSTAR" will give you a Suzuki experience that others could not.

## ECSTAR V7000

Suzuki engineers have created a premium oil that has not only exceeded all standards set by the NMMA but more importantly has been designed specifically for Suzuki marine engines. ECSTAR is FC-W equivalent and uses a high quality low sulfur content based oil that reduces ash build-up for increased durability and the high viscosity index is a major contributor to maximising fuel efficiency.

### ECSTAR V7000 SEMI SYNTHETIC MARINE ENGINE OIL

High performance blend of synthetic lubricants and premium mineral oils engineered to protect your Suzuki engine and optimise its performance.

- Less engine water
- Lower oil consumption
- Improved starting
- Reduced fuel consumption

Premium oil that has been designed especially for Suzuki marine engines does not only end with ECSTAR V7000. To meet your demand, we have set ECSTAR V5000. High quality based oil gives your four stroke outboard engine an outstanding performance for wear protection, viscosity stability, low volatility and excellent protection against rust and corrosion.

## ADVANTAGE OF ECSTAR

### Fuel Savings

The Genuine Formulation provide the high performance and help to improve fuel economy.

### Outstanding Engine Protection

The innovative lubricating technology achieves thermal stability, which contribute to the ultimate engine protection even when starting engine in cold climates.

### Clean Engine for Longer Life

Cleaning performance helps to prolong the engine life.
